

New Product

Question

If you could invent something new, what product would you develop? Use specific details to explain why this invention is needed.

Essay

My idea for a new product is a wake-up machine because we can hardly have enough time in the every morning. We all think we want to sleep more time in the morning. So, we sleep late and are late for school or company. Also, we can't have time of breakfast and preparation for school or company. Breakfast is the most important dish for our health and preparation is always necessary. I wish I would have a margin for time more. Therefore, if I could invent something new, I would develop a wake-up machine. It is very useful and epoch-making invention for us. There are three reasons why this invention is needed.

First, the machine can wake you on time which you decided. Thanks to it, we will be never late for school or company. We can sleep at rest everyday. Sleeping is the best way which you can relax and remove your tiredness for the day. People need even a little sleeping. For example, if you live by yourself, you may not be able to sleep with worry about whether you get up on time. So, you can't relax and rest at all. To wake up on time comfortably, the machine is essential. It regularly wakes us everyday. You can have more a margin for time.

Second, it takes care of breakfast. Even if you can get up early, you may think cooking breakfast is troublesome. Then, are you glad to be prepared breakfast for you, aren't you? The machine cooks breakfast for you quickly and it is very delicious! In addition, you can eat it without doing anything. The machine makes you eat it nicely. What a luxurious life we have! You will feel as if you were a king. We can live healthy and with grace.

The last reason is change of clothes. You don't have to move from your bed and the machine changes into your uniform. You only lie down on the bed, and while it washes your face and dress your hair. I think anyone feel I want to be more handsome or cute or beautiful. Therefore everyone dress their hair or make up their faces to be as better as possible everyday. You may think if you had more time in the morning, you would be able to be better hair or face. If you have this machine, the problem will solve soon and yourself will be as you wanted.

You think the machine is really useful and that you want it, don't you? It can do three things at the same time. Consequently you can save precious time in the morning and get a comfortable and ideal life! It will be very popular in the all world because people all over the world wish there is such machine in our houses. That is to say, our dreams come true. After several years, if it spreads all over the world, our life will be improved better. But we mustn't depend on it only. It is important for us to strive to improve our life. We get our wonderful life by ourselves. We have to progress ourselves with the progress of science.
